

1 **Abstract of Disclosure**

2 A tool-holding apparatus is provided for holding at least one tool. The
3 tool-holding apparatus includes a board and at least one holder formed on
4 the board. The holder includes a root extending from the board, a tip
5 extending from the root for pressing the tool, a restraint formed thereon
6 near the tip for restraining the tool and a concave portion defined therein
7 near the root for receiving the tool.
